

Acca Industries S.r.l.

Presentation

| Innovation for a sustainable future
| Optimize you Engine's Performance

PROBLEM

25% of EU (European Union) greenhouse gas emissions are caused by the use of internal combustion engines for road transport of goods or people.

Greenhouse gas emissions are one of the main causes of global warming.

The urgent energy transition is expensive!!

INTERNAL COMBUSTION ENGINES STILL IN USE AROUND THE WORLD – AUTOMOTIVE SECTOR

- **In the EU: around 400 million** of which more than **55%** have an environmental class in **EURO below 5 = 230 million vehicles)**

NOT JUST IN AUTOMOTIVE

Marine, Industrial, Agricultural, Earth Moving, Heating, Cogenerators and other Sectors.

SOLUTION

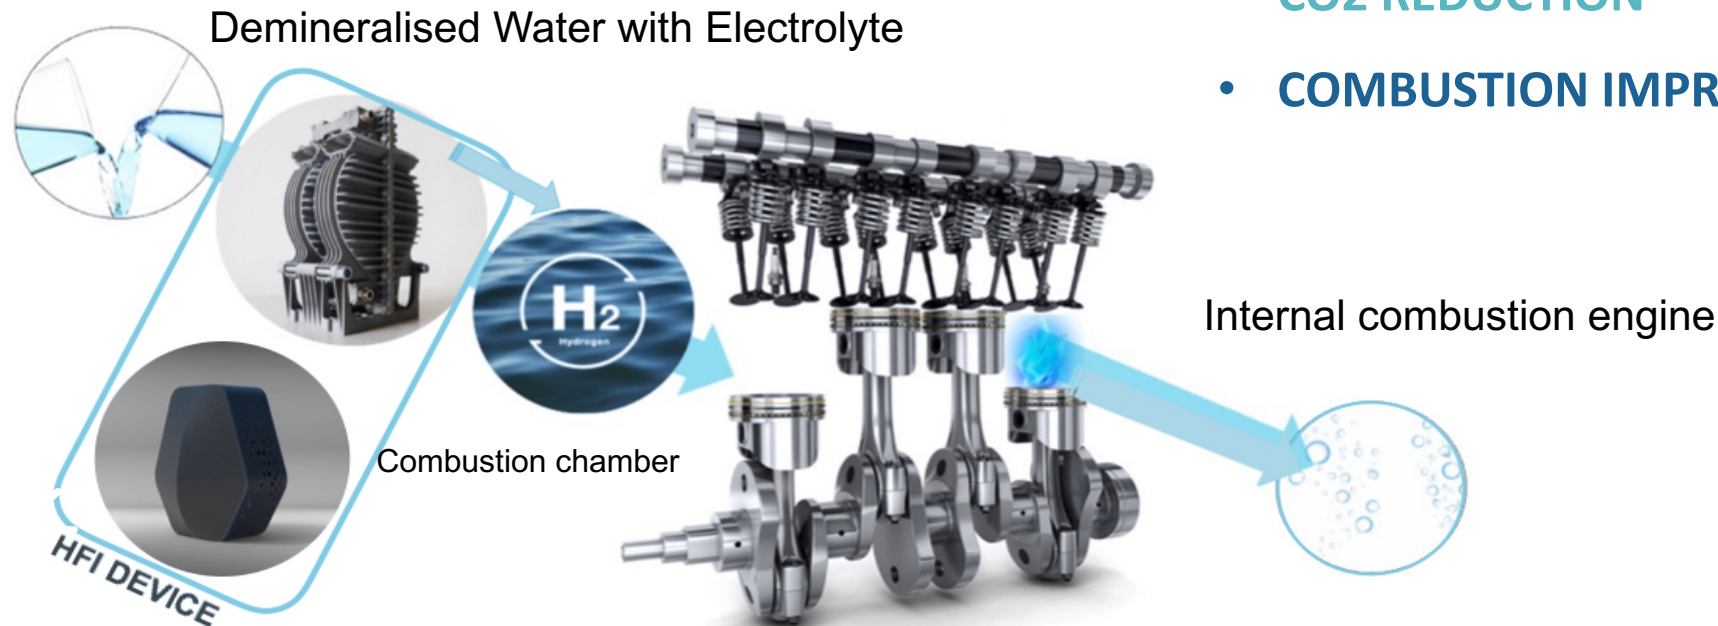

We transform current combustion engines into less polluting combustion engines

An after-market and retrofit device for the production of hydrogen and oxygen "on demand" (without storage) to be connected to internal combustion engines allowing to obtain:

- REDUCTION OF NOX, HC, CO, PM POLLUTANTS
- REDUCED FUEL CONSUMPTION
- CO2 REDUCTION
- COMBUSTION IMPROVEMENT

Acca Industries HFI device (Hydrogen Fuel Injection)

Acca Industries will focus in 2022
on the following markets (Italy-EU)

Fishing
Boat
Market

01

03

Refrigerated
Trucks
market

Tractor &
Stationary
Engines
Market

02

04

Earth Moving
Engines
Market

MARKETS WITH LOW NORMATIVE IMPACT
WITH REFERENCE TO ENVIRONMENTAL ISSUES.

2023
Italy / EU

Thermal plants

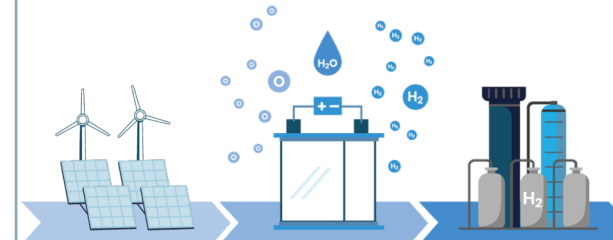

Bus/Truck

Industrial Sectors

2024
Italy / EU / other

2024
Green Hydrogen

Our Team

Andreas Hummer
CEO - CTO

Stefano Corsi
Tech Dept - Sales

Enrico Benassi
Prof.Dr Mathematical, Physicist

Giovanni Piazzola
Manufacturing Engineer

Marco Romani
Electronic Engineer

Massimo Bruni
Tech. Dep.

Claire Lusardi
CMO

Francesco Alfeo
Tech Dep.-Sales

Nicolò Rossetti
Material Sciences

Silvia Alfeo
Adm. Org

Fabio Ferrulli
Product & Visual Designer

Lucrezia Solofrano
Product & Visual Designer

Why to invest?

- **Innovation in the field of hydrogen production** and reduction of greenhouse gas emissions (GHG), applicable in different industrial sectors
- **Intellectual property protected** by 2 international patents and 2 patent applications with search report results
- **Payback on the customer's purchase** with a short/medium time horizon (≤ 12 months)
- Founding Partners and Management with **proven experience and with heterogeneous skills suitable** for the development of a complex project
- **We are an Eco-Industrial startup** with a productive vocation on the national and European territory
- **We proceeded to finance the entire start-up of the activity**, before looking for investors for our next Round
